IOT SOLUTIONS

Use-based Cleaning Operations

Monitor, detect and alert when and where action is required based on insight generation via data analysis.

Use your resources more efficiently

Adjust your cleaning team schedule based on actual restroom usage and reduce unnecessary checks on clean spaces.

Increase customer satisfaction

Action your cleaning team when and where it is effectively needed never allowing restrooms to go below an acceptable cleanliness level.

Increase dwell time and return visits

Achive consistent restroom cleanliness levels and get your customers back and with a positive perception of your service's full scope.

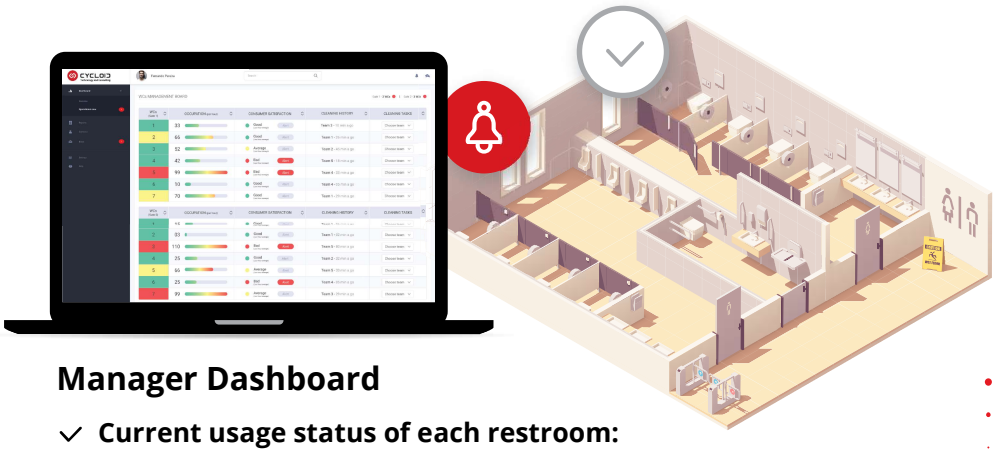
CYCLOID
Technology and Consulting

SMART CLEANING
Facility Management
IOT SOLUTIONS

System Integration
Manage and automate your cleaning operations service (Inventory, Utilities consumption, HR)

Contact us
We're happy to show our demos to reinforce your decision

Increase efficiency by adjusting your cleaning operations to the actual usage. Your users will come back!
Through an intuitive interface you manage and quickly decide where to allocate your cleaning teams.



Report Generation
Manage your operation's progression to predict and prevent critical cases

Alerts Management
Define the events covered and when to receive an alert (near-critical cleanliness level, etc)

Multi Platform
Monitor easily your operation by accessing your Phone, Tablet or Desktop computer

Manager Dashboard

- ✓ **Current usage status of each restroom:** number of visitors since the last clean up
- ✓ **Position/ Availability of each team**
- ✓ **How long is spent per restroom:** predict cleaning completion and teams availability
